EDUCATION

S-1 Matematika – Institut Teknologi Sepuluh Nopember

Surabaya, East Java

Bachelor of Mathematics (Computer Science), Faculty of Science and Data Analytics

2022-2026

Relevant Coursework: Data Science, Data Mining, Introduction to Machine Learning, Cloud Computing, Web Application, Science Computation, Digital Image Processing, Database Technology

WORK EXPERIENCES

GDP Labs (Djarum GDP's Venture)- Surabaya, Indonesia

February - July 2026

AI Data Scientist Engineer Intern

- Built end-to-end Agentic AI for data science named GL Tabular to enhance efficiency by 90%, improving workflow faster from 30 days to one week.
- Built two framework Data Science Agents for forecasting and anomaly detection with adaptation from SOTA research, enhancing the performance and accuracy by 95% and token reduction by 80%.
- Built GL Vision for spoof detection in facial recognition with more than 10 cases, reducing failures of APCER and BPCER by 96%.

Avalon AI – Surabaya, Indonesia

December 2024–November 2025

Data Scientists Lead

- Developed a stateless HTTP backend service for Maps Lead AI, commissioned by Boring AI, to generate business leads based on criteria like business type, location, and reviews. Built five HTTP POST endpoints, integrated with the Workflow Executor and utilized Google Maps, SearchAPI.io, and OpenAI APIs for search, scraping, and review analysis, ensuring precise lead scoring.
- Leading a team of startups to delegate in data science competitions and successfully winning more than 10 championships at the national level.

PT DIVUSI – Surabaya, Indonesia

December 2024–November 2025

Data Scientists Intern

- Analyzed supply and demand datasets across 34 provinces and 514 cities/regencies in Indonesia, sourced from BUMN company and international enterprises.
- Developed and A/B tested tree-based forecasting models (Random Forest, XGBoost) for 12-month supply-demand prediction, reducing RMSE by 89%.
- Designed interactive dashboards with Streamlit to visualize correlation analysis and delivered strategic recommendations to stakeholders.

ORGANIZATIONAL EXPERIENCES

Google Developer Group on Campus ITS – Surabaya, Indonesia

Machine Learning Lead

October 2024 – August 2025

- Contributed to the development of a one-month machine learning mini bootcamp and learning curriculum for beginner to intermediate learners, focusing on supervised and unsupervised learning in machine learning concepts.
- Delivered an Introduction to Machine Learning session with hands-on coding for 100+ participants. Used real-world case studies to strengthen applied learning and build a collaborative tech community.

IEEE ITS Student Branch – Surabaya, Indonesia

Academics Lead

February 2024 – January 2025

- Coordinated an international scientific writing seminar with faculty and global speakers.
- Formed partnerships to bring in overseas speakers and drive 60-attendee international forums.

AWARDS

- [National] Juara Harapan II Big Data Challenge Satria Data ITS 2025 – Kemenristekdikti
- [National] Top 20 Pertamina Early-Stage Startup Competition 2025– PT Pertamina
- [National] PKM-KC (Program Kreativitas Mahasiswa Bidang Karya Cipta) 2023 – Funded by Kemenristekdikti
- [National] Top 5 GAMMAFEST Data Science Competition 2024 – Himpunan Mahasiswa Statistika IPB
- [International] TOP 3 GPBL Data Science Projects in Japan – Mathematics Department ITS and Computer Science Major SIT Japan

CERTIFICATION

- AI Engineer for Data Scientist Associate Certification from Datacamp February 2025
- MOS Data Analytics from Microsoft September 2025
- Data Scientist Professional Certificate from Datacamp October 2025
- SQL Advance Certificate from Hackerrank August 2024
