

JIRYAN FAROKHI

Surabaya, Indonesia | +62 851-5609-2875 | jiryanfarokhi@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#) | [Kaggle](#)

SUMMARY

Fresh graduate in Mathematics (Computer Science) from Institut Teknologi Sepuluh Nopember with hands-on experience in data analysis, forecasting, and dashboards developments. Skilled in Python, SQL, and BI Tools (Looker Studio, Tableau), with a track record of translating raw data into actionable insights across data science and consulting projects. Has experience with AI/ML including NLP, Computer Vision, LLM, RAG, Agentic AI, and backend systems. Recognized for strong leadership, communication, teamwork, structured problem solving, and the ability to adapt and drive projects toward impactful results.

EDUCATION

S-1 Matematika – Institut Teknologi Sepuluh Nopember

Surabaya, East Java

Bachelor of Mathematics (Computer Science), Faculty of Science and Data Analytics, cGPA: 3.38/4.00 2022-2026

- Relevant Coursework: Data Science, Data Mining, Introduction to Machine Learning, Cloud Computing, Web Application, Science Computation, Digital Image Processing, Database Technology.
- Final Thesis: Hyperparameter Optimization on Tree-based Models using Genetic Algorithm for Predicting Revenue of SMS International Services

International Experience

Global Project Based Learning ITS – SIT 2024 Data Science in Japan – Tokyo Japan

Member

September

2024

- Make a time series project to predict sales with data science techniques.
- Learn to work together with international students.
- Got the 3rd rank from all teams with collaboration between Indonesian and Japanese students.

WORK EXPERIENCES

GDP Labs (Djarum GDP's Venture)- Surabaya, Indonesia

February–August 2026

AI Engineer Intern (Tabular Team)

- Built an end-to-end Agentic AI system for data pipeline problems using LLM Agents, Skills, custom CLI, schema query pattern for data masking, and Context Management with CI/CD pipelines for streamlined testing and deployment, leveraging approaches from state of the art methods.
- Developed two Agentic Data Science frameworks for time-series forecasting and anomaly detection, achieving 95% performance improvement and reducing operational cost (token usage) by 80% through workflow and context optimization.
- Developed a face anti-spoofing system covering 10+ spoofing scenarios, improving detection reliability and deploying the inference pipeline using Docker for reproducible model serving.
- Created 20+ english documentation projects for presenting to other developers and engineers.

PT DIVUSI – Bandung, Indonesia

January–February 2025

Data Scientist Intern

- Analyzed supply and demand datasets across 34 provinces and 514 cities/regencies in Indonesia, sourced from a BUMN company and international enterprises.
- Developed and A/B tested tree-based forecasting models (Random Forest, XGBoost) for 12-month supply-demand prediction, reducing RMSE by 89%.
- Designed interactive dashboards with Streamlit to visualize correlation analysis and delivered strategic recommendations to stakeholders.

Avalon AI – Surabaya, Indonesia

December 2024–November 2025

Data Scientists Lead

- Developed a stateless HTTP backend service for Maps Lead AI, commissioned by Boring AI, to generate business leads based on criteria like business type, location, and reviews. Built five HTTP POST endpoints, integrated with the Workflow Executor and utilized Google Maps, SearchAPI.io, and OpenAI APIs for search, scraping, and review analysis, ensuring precise lead scoring.
- Led a team of startups to delegate in data science competitions and successfully winning more than 10 championships at the national level.

Institut Teknologi Sepuluh Nopember – Surabaya, Indonesia

August–September 2024

Course Assistant, Programming and Computer Algorithm

- Guided 30+ students through foundational programming and algorithm concepts.
- Author learning modules, presentations, and practice quizzes for hands-on labs.

ORGANIZATIONAL EXPERIENCES

Google Developer Group on Campus ITS – Surabaya, Indonesia

October 2024–August 2025

Machine Learning Lead

- Contributed to the development of a one-month machine learning mini bootcamp and learning curriculum for beginner to intermediate learners, focusing on supervised and unsupervised learning in machine learning concepts.
- Become a speaker for delivering material about introduction to machine learning with coding sessions for over 100 participants, incorporating real-world case studies to enhance applied learning and foster a collaborative tech community.

IEEE ITS Student Branch – Surabaya, Indonesia

February 2024–January 2025

Academics Lead

- Researched and wrote articles on emerging technology trends for IEEE ITS Student Branch's magazine, helping members stay informed on developments in AI, smart electrical systems, and IoT
- Formed partnerships to bring in overseas speakers and drive 60-attendee international forums.
- Coordinated an international scientific writing seminar with faculty and global speakers.

PROJECT

SMS International Transactions Dashboards (2026) [link](#)

Google Looker Studio

- This is my final year project to visualize SMS International Transactions services from a Telecommunication company in Indonesia. Analyzed the data around 93000+ data from SMS International transactions around 2023-2024.

Content Engagement Analysis (2025) [code](#)

Python, Next JS, Figma, FAST API

- End-to-end project from data scraping to dashboard for analyzing video reels Instagram with many sentiments. Designed Key Performance Index (KPI) metrics to give the recommendation content. This project got the top 5 for Satria Data Big Data Competition by Ministry of Education. Built the design of the dashboards using Figma and convert to code with Next JS frameworks.

Road Accident Dashboards (2024) [link](#)

Tableau

- Analyzed sales transaction data to identify revenue drivers, customer purchasing patterns, and underperforming product segments. Built a dashboard with KPI monitoring, geographic analysis, and product-level performance insights, enabling stakeholders to identify growth opportunities and prioritize high-value segments for data-driven business decisions.

SPEAKER

- **CPRO (Sentiment Analyst with Natural Language Processing) 2024** - Himatika ITS
- **Mini Webinar (Data Science in Business Application) 2026** - Himasakta ITS
- **Build with AI (Navigating the New Era of AI Production) 2026** - GDGoC ITS

AWARDS

[National] **5th Winner Big Data Challenge Satria Data 2025** – achieving top 5th among 135 teams.

[National] **Top 20 Pertamina Early-Stage Startup Competition 2025** – selected top 20 among 1000+ teams.

[National] **PKM-KC (Program Kreativitas Mahasiswa Bidang Karya Cipta) 2023** – Funded by Kemenristekdikti.

[National] **Top 5 GAMMAFEST Data Science Competition 2024** – held by Himpunan Mahasiswa Statistika IPB.

[National] **Start-up Funded IYT (ITS Youth Technopreneur) 2025** - funded 15M by ITS.

[National] **Selected Team Representative from ITS, Data Mining Category Gemastik 2025** - selected as top 10.

[International] **TOP 3 GPBL Data Science Projects in Japan** – Got the JASSO Scholarships.

CERTIFICATION

- [SQL Advance Certificate from Hackerrank](#)
- [Microsoft Office Specialist: Data Analytics from Microsoft](#)
- [AI Engineer for Data Scientist Associate Certification from Datacamp](#)
- [Fundamentals of Deep Learning Certificate from NVIDIA](#)

July 2024

September 2025

April 2025

September 2025

TECHNICAL SKILLS

Data Analysis and BI Tools: SQL, Tableau, Looker Studio, Excel

Languages: Python, Java, SQL, JavaScript, TypeScript

AI & Machine Learning: NLP, Computer Vision, LLM, RAG, Predictive Analytics, Deep Learning

Framework & Libraries: Numpy, Pandas, Tensorflow, Keras, Scikit-learn, NLTK

Development Tools: Git, Docker, Grafana, Prometheus, Linux, GCP, FAST API's, HuggingFace

Data Engineering: ETL, Data Pipeline, Data Preprocessing

Data Visualization Tools: Excel, Google Looker Studio, Tableau

Development Practices: TDD, SDD, Clean Code, Event-Driven

AI Integration Skills: Claude Code, Codex, Opencode

Collaboration & Productivity Tools: Notion, Google Workspace, Discord
